ALIEN PISTOL

ALIEN PISTOL – THE FIRST OF ITS KIND

Alien by Laugo Arms is revolutionary semiautomatic pistol with several patented and unique technical solutions. Alien system of operation does not use obsolete locking mechanisms or normal trigger mechanism. This new approach is driven by the vision of progress which we want to give to the shooters.

Alien system incorporates:

- The Lowest bore axis
- Fixed barrel
- Slide is reciprocating only on sides
- Low center of gravity
- Gas piston delayed blowback
- Exchangeable non-reciprocating upper part of the slide
- Robust uncomplicated military grade construction
- User friendly standard striker fire controls
- High level of modularity and easy customization

ALIEN PISTOL

SPEED

Every shooter is faster with Alien pistol.

This is caused by the lowest bore axis in the world.

Bore axis is located just 1,7mm under the axis of shooters grip.

As a result, the pistol practically does not elevate after the shot and has almost flat recoil angle and no muzzle flip.

ALIEN PISTOL

ACCURACY

With Alien pistol shooters are more accurate.

This effect is caused by the permanently fixed barrel to the frame.

As a result, the barrel does not move during the fire cycle and can free float like on the sniper rifle.

That altogether with precise manufacturing contributes to the exceptional accuracy of this firearm.

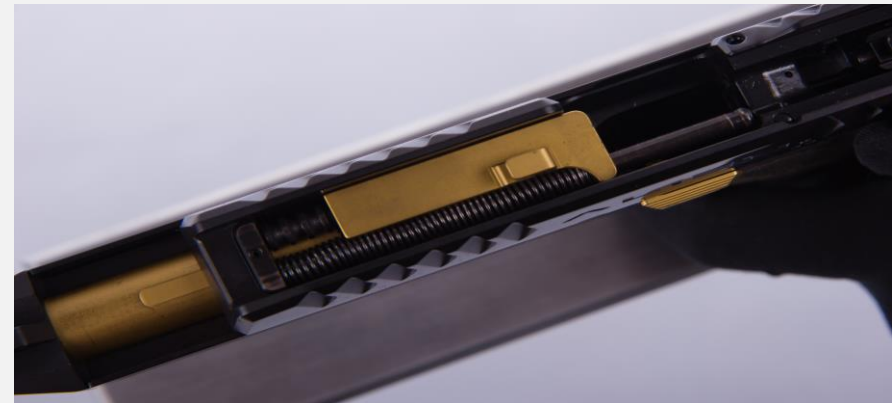

ALIEN PISTOL

CONTROL

The Alien pistol brings you perfect controllability.
During the firing especially when rapid firing or performing double taps.
This perfect controllability is achieved by Laugo Arms gas delayed blowback system.
Alien does not have obsolete locking slide instead we took the gas pressure from the barrel and we let it slow down the recoil by using this power through gas piston against the slide movement.
The more powerful shot the more it slows down the recoil.
That gives shooter maximum recoil control even with different types of ammo.

ALIEN PISTOL

MODULARITY

The Alien pistol can be extremely easily adopted for different purposes. With just one click shooter can change the nature of the Alien pistol by changing the upper part of the slide.

There are different slide rails available for iron sight, many types of red dot sights, or even MIL-STD-1913 rail.

Moreover, Alien can be equipped with open division kit, that includes compensator, open division upper slide rail, magwell and other optional upgrades.

ALIEN PISTOL

TARGET ACQUISITION & RED DOT ENDURANCE

The shooter gains the advantage from perfect target acquisition.

This has been achieved by permanent line of sight which, unlike the old school pistols, does not reciprocate during the fire cycle.

Thanks to this feature shooter can easily control the target all the time even when rapidly firing as he will never lose the line of sight.

Red dots will last much longer on the Alien pistol due to the non-reciprocating upper part of the slide.

On most pistols the movement of the slide damages the red dot which results to constant need of replacement.

The red dot on Alien pistol will last the same as on the standard SMG or rifle – the way it has been designed to work.

ALIEN PISTOL

TACTICAL TECHNICAL DATA

Length:	Performance/Retro	210 mm/8.2"
Width:		29 mm/ 1.1"
Height:	Performance/Retro	148 mm/5.8"
Barrel length:		
	Performance/Retro	124 mm/4.8"
Weight:		1.009 g/ 2.2 lbs.
Weight with empty magazine:		1.121 g/ 2.47 lbs.
Trigger pull adjustable:		10 to 25 N * adjustable by manufacturer
Standard magazine capacity:		17
Bore axis:		1,7mm below the line of grip axis
Number of replaceable slide rails:		infinity
Recoil angle:		½ of the others

ALIEN PISTOL

OTHER FEATURES

Alien pistol is defined by today's standards like:

- Exchangeable backstraps
- Exchangeable grips
- MIL-STD-1913 rail
- Adjustable iron sights
- Trigger safety
- Striker safety block, etc.

ALIEN PISTOL

ALIEN FULL KIT

Nanuk case 915
3 Magazines
Laugo RD 6MOA Red Dot Sight
Elornis Industries Kydex Holster
Heart 6 Holster Hinge with Quick release
Optical Sight extra Upper Rail
Aluminium Magwell
Diamond Like Carbon finish
Aluminium Grip
Stainless Steel 4,8" Semi-Bull Barrel
Fiber Optic sport sights.
G 10 VZ Grips
Barrel Grade Steel Titanium Nitride Piston
Titanium Nitride Spring Rod
Approx. 14N Precision Trigger

Available varieties :

- Standard or Threaded Barrel
- 10 or 17 Rounds Magazines
